Positions:

**Benefit:** This lift mechanism has been designed to guarantee the high lift performance and maximum comfort. An actuator regulates the different positions: closed, TV, relax and lift. The actuator extends the footrest and performs a

slight tilting action of seat and backrest; then, it reclines the backrest reaching the maximum comfort position, or from the closed position it lifts both the chair and the person. The mechanism is equipped with a base.

## Optional

|                         |             |                     |
|-------------------------|-------------|---------------------|
| <b>SOME ACCESSORIES</b> | KIT MF 5191 | HEADREST & RATCHETS |
| KD                      | DORSAL      |                     |
