Benefit: The **BOXED MILLENIUM** handcontrol is the revised and improved version of the **MILLENIUM TOUCH SENSOR**. Easy to install, high resistance to wear over time and to interference (eg electrostatic discharges, environmental disturbances), are the aspect that make it a succesful product.

In fact, it can be installed both inside and outside the

armrests of the upholstery, the only visible parts are the buttons; the reduced dimension allows to install the **BOXED MILLENIUM** inside the seat cushion, giving the finished upholstery a very minimal look. **BOXED MILLENIUM** is compatible with all control units of the Eko line.
