Benefit: DECKCHAIR glider and swivel is the manual variant of the motorized product of the same name. The action of the user's weight combined with a manual release allows the customer to use the upholster easily in comfort and safety. Use is simple, operating the manual release will immediately switch the upholster from the closed position to Tv; subsequently, moving the user's weight back will switch

the seat from the tv position to full relax. DECKCHAIR glider and swivel features a tilting (glider) and swiveling (swivel) movement designed to provide high performance at the end-user comfort level, making this product unique. DECKCHAIR is designed to make upholstered furniture with a CLOSED BASE.
