

# DRIVER

BETWEEN HUMAN AND TECHNOLOGY

					<b>6 MONTHS</b>
Wired	Wireless	160gr+/-70gr	Armchairs	Sofas	Warranty

**Benefit:** The hand control **DRIVER** is an ergonomic product, solid and user-friendly. Contemporary and attractive design makes this product the quality detail of the upholstered furniture. The purpose of this product is to facilitate the user experience.

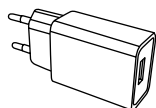

Available in wire and wireless version with rechargeable battery with wireless system (to be ordered separately). The charging cycles of the battery vary depending on the mechanism and the electric kit used (a full charge takes about 3 hours). In case of inactivity, to avoid irreparable damage to the battery, make a full charge within 3 months from the last (full) recharge. Prolonged unusability significantly reduces the life expectancy of the battery

causing permanent damage that excludes it from the Motionitalia warranty conditions.

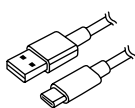

#### FEATURES:

- Movement of three/four motors (suitable for lift mechanism)
- Possibility to save the preferred position (2 memories), if the control panel is predisposed
- Icon graphics easy to understand
- With Reset/ Home buttons the upholstery returns in the closed position
- Surface soft touch treatment (to increase the "grip" between the product and user's hand).

OPTIONAL  
for wireless  
version

USB WALL CHARGER

USB CHARGER CABLE
