Benefit: FACILE^{up} footrest M1 is perfect for sofas and armchairs (fixed and swivel), with clean and thin lines. Thanks to its very solid and compact base structure, this mechanisms grants a wide range of options in the choice of the design of the finished product. One actuator activates the movement of the mechanism from closed position, to TV and relax. The design of the levers, minimal and linear, allows a sliding movement of the mechanism to improve the comfort of the upholstered

furniture. Thanks to the presence of the subottoman, the padded mattress remains pulled better in all phases of the movement of the seat, in addition to offering greater support to the calf open footboard. Highly customizable, from pins to bases and push buttons, to meet the needs of our most demanding customers. FACILE^{up} footrest M1 has been designed to create fixed and swivel OPEN BASE upholsteries (up to 200mm).
