Benefit: FREEDOM is a versatile and customizable built-in hand control. It can control mechanisms with one or two actuators thanks to the space-saving tilting buttons that make this product compact and functional. The external cover is interchangeable so that this remote control can come with different aesthetic solutions that

make it suitable for any kind of furnishings. The shape of the cover, elongated with two side openings, allows to glimpse the covering of the upholstery: in this way, the remote control and the sofa can be seen as a single unit. Freedom can be installed both inside and outside the armrest.
