**Benefit:** Thanks to LALZAGAMBE onthelegs you have the possibility to transform any padded with a fixed **open base** (therefore without mechanism) in a padded with a footboard mechanism. To install it in the padded you need to have the feet that support the finished product at least 120mm

high (otherwise you need to replace them to ensure the proper functioning of the mechanism). Thanks to LALZAGAMBE, any padded without movement can be radically transformed into a hybrid product offering the end user a new type of comfort.
