Benefit: MO-311 LIFT M1 is designed to ensure high lifting performance and comfort, facilitating the everyday life of the most needy user. The actuator adjusts the different positions: Closed, Full relax and Lift. The latter extends the footboard by doing a slight tilting action to the seat and backrest. The footboard and backrest will then open, in a

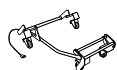

synchronized way. The lift system lifts the padded (from closed position) allowing the person to stand upright. Optional are available that give the final customer the opportunity to have a product customized according to their needs. The mechanism is equipped with a base.
