Positions:

**Benefit:** MOMO security has a solid and functional structure, allows the same width between the seat and footboard ensuring visual and formal continuity to the finished product. It allows infinite relaxation positions with simple electric adjustment, all flush with the wall. The **security footboard** is designed to provide maximum protection for the user, but especially for those around them (children and pets). Thanks to an innovative system, during

closing, if an obstacle is detected, instead of compressing it, the footboard is activated, avoiding damage to any body that may be in the way. The design being **single lever**, acts as a casing and offers a significant increase in both safety and aesthetics. Finally, this mechanism, thanks to the kinematic mechanism based solely on levers, provides **greater stability**.

### Optional

SOME ACCESSORIES	KD	ELECTRIC KIT	ACTUATORS	CONTROL SYSTEM	BUILT IN SWITCHES	CONTROL PLATES
HEADREST	CIRCULAR PLASTIC STABILIZER BAR	PLUGS & CABLE EXTENSIONS	POWER SUPPLY & BATTERY PACKS	TOUCH SENSOR	WIRED/ WIRELESS REMOTES	SMARTPHONE CONTROL SYSTEM
