Benefit: OPEN SPACE invisible D.S.C is a highly innovative mechanism. Designed to be fully integrated with the padded allows a great freedom in the stylistic choice of the finished product. The invisible effect obtained through the fixing of the footboard at the center of the mechanism allows the footrest to not affect the product line and disappear completely even when the padding is open.

The particular closure of the footrest which remains at about 17° compared to the ground, allows:

- to make a **flap tablet longer (50mm)** than the standard mechanisms, increasing comfort in "full relaxation"
- to design a padded with soft lines.

This product is used in the design of OPEN-BASE upholstery (high feet up to 180mm).
