## PIASTRA

**Benefit:** PIASTRA is a simple and minimal built-in remote control. Extremely versatile and user-friendly is available with different configurations and functions (2 or 4 buttons with or without USB). It can be installed inside, outside or on the armrest, both on armchairs and sofas. Combining the

handcontrol with an EKO control unit is possible to reach various movements, from sequential to synchronized, in order to satisfy the most refined requests of our clients. The finishing is chromed and the buttons, chromed too, are backlit (blue or white) for a more elegant look.
