Benefit: The Profondo D.S.C. two motors is ideal for making upholstered from the deepest seat (of 70mm) and more compact (of 40mm), compared to the standard version. The presence of two motors allows to release the operation of footboard and seat (which move in a synchronized manner) from that of the backrest (which is driven by a dedicated engine). By operating the actuators you can choose, therefore,

whether to recline the backrest or move the seat and footboard; or to move the two elements simultaneously. The electric adjustment allows infinite relaxation positions. A wide selection of finishes allow the customer to further customize the design of the mechanism in order to create a unique padding. This model is also ideal for padded CLOSED BASE (low feet) and OPEN BASE.

Optional

SOME ACCESSORIES		
	CARTER	METAL STRAP
KD	FINISHES	HEADREST & RATCHETS

ELECTRIC KIT	
	ACTUATORS
PLUGS & CABLE EXTENSIONS	POWER SUPPLY & BATTERY PACKS

CONTROL SYSTEM
