Benefit: REVOLVING POWER M3 GRAVITÀ ZERO is a versatile mechanism designed for the creation of modern and compact armchairs. The trapezoidal vacuum seat allows the designer to create finished products with various shapes, from classic to contemporary. Equipped with three motors, in addition to the "standard" positions that can be reached with a classic mechanism (closed / tv / full relaxation), REVOLVING expands the range by introducing the position "zero gravity".

Thanks to this new function, the user has the possibility to recline the padded further by carrying the legs higher than the rest of the body, experiencing the additional physical benefits that only this new position transmits. **REVOLVING POWER M3 ZERO GRAVITY** is configurable, various options are available and give the possibility to the end customer to have a customized product according to their needs.

Positions:

Closed

TV

Full Relax

Zero gravity
