Positions:

**Benefit:** SCORPION claws open base motorized is an innovative product. Compared to the variants belonging to the same family, the open base model differs in the design and functionality of the foot levers that allow, through the presence of the flap, to insert a submachine that remains hidden when the mechanism is closed, and then appear

during the opening with the aim of further increasing the space and comfort dedicated to the footboard area, as well as offering an idea to further customize the final design of the padded. This mechanism is designed for upholstered OPEN BASE (high feet) and fixed seat, as moving the footboard, the positions of the seat and backrest will remain unchanged.

## Optional
