**Benefit:** The **SHADOW** is the result of the union between the Millenium touch sensor, a must among Motionitalia products and the wireless technology. The result is a versatile product, in fact it can be used both as a built-in pushbutton (if in the padded it is provided a pocket that can accommodate the keypad predisposed for its magnets) and as a remote hand

control. Mainly designed to move one motor, but it can move a 2-motor seat through the use of another Shadow connected to the same control unit. The wireless remote control/control unit association procedure is very simple and intuitive and makes this product suitable for everyone. A further feature of this product is the built-in USB rechargeable battery.
