

# SLASH

BETWEEN HUMAN AND TECHNOLOGY

				<b>6 MONTHS</b>
Wireless	140gr	Armchairs	Sofas	Warranty

**Benefit:** SLASH is a wireless hand control with an ergonomic design. Available in different configurations, thanks to the selector button it's possible to move more than one seat through a single product. Depending on the type of control unit and its features, it is possible to get sequential partial or independent movements of the components. The metal structure and the ergonomic handle make this hand control a solid and functional product. The wireless version is also characterized by an integrated rechargeable battery (through a USB connector type B), which supplants the now

obsolete battery versions. The charging cycles of the battery vary depending on the mechanism and the electric kit used (a full charge takes about 3 hours). In case of inactivity, to avoid irreparable damage to the battery, make a full charge within 3 months from the last (full) recharge. Prolonged unusability significantly reduces the life expectancy of the battery causing permanent damage that excludes it from the Motionitalia warranty conditions. Customization of the color of the cover is available upon request.
