Benefit

The **SMART SYSTEM** is a fully customizable intelligent security system patented by Motionitalia, which allows the user to have safer and more reliable mechanisms. This in turn gives greater confidence and allows the user to be able to relax in complete safety.

The SMART SYSTEM is installed inside the control box and must be combined with Motionitalia mechanisms equipped with an encoder motor. (When combined, the encoder motor and control box can analyze the electrical absorption, recording any anomalies that may activate the Smart System, blocking the motorized system, preventing any potential entrapment).

The SMART SYSTEM can be integrated into a wide range of current Motionitalia products. With very easy installation it can be fitted into any type of furniture, regardless of the type of upholstery, the padding and the different covering fabrics and materials which all generate different kinds of frictions and characteristics. With a very simple manual operation, the control box can memorize all forces in action during the closing movement.

The SMART SYSTEM can be integrated into the following families of Motionitalia mechanisms:

- *SPAZIO,*
- *OPLÀ,*
- *OPEN SPACE,*
- *SUITE,*
- *ONDA,*
- *SVAGO,*
- *FACILE,*
- *PROFONDO*

Headrests:

- *PLIV,*
- *PUSH HEAD,*
- *SPIN UP,*
- *GO UP*
