Full Relax

**Benefit:** SPAZIO motorized is the product widely used in the design of padded **open base**. The solid and functional structure, the flap that allows the user to have more space in the leg area and electric adjustment, are just some of the winning features of the double zero version. This mechanism is characterized by a more spacious seat, which in combination with the flap, allows manufacturers of padded to be able to

use a single mattress while maintaining the same width between the seat and footboard. The electrical adjustment allows the user to find the most comfortable position of use, all in safety, thanks to the characteristic 0-Wall. It is also possible, on request, to customize the finishes of the exposed parts.

## Optional
