Positions:

Closed

TV

**Benefit:** SPAZIO one move motorized is a functional and minimal mechanism. Installed in the padded allows the user to open the footboard bringing the seat from the closed position to the most comfortable and relaxing tv. Thanks to a flap, the mechanism ensures greater extension of the footboard, exponentially increasing the comfort of the user (also allowing the manufacturer to use a single mattress between the seat and footboard, opening an infinity of design roads in order

to create an original padded). The characteristic 0-Wall (wire wall) allows the customer to place the padded near the wall of the room and to move it safely, avoiding possible collisions. Possibility to customize, on request, the visible finishes of the product choosing from a series of surface treatments. SPAZIO one move has been designed to create upholstered OPEN BASE (high foot).

## Optional
