Benefit: SPAZIO smart reinforced motorized is the reinforced version of the homonymous SPAZIO smart motorized. In fact, as in the "standard" version, the mechanics have a solid and functional structure. This mechanism, designed for the most spacious seats (vacuum 1200mm), is in fact equipped with reinforced bars and jaws that make the structure more resistant. The electrical adjustment allows the

user to find the most comfortable position of use, all in safety, thanks to the characteristic 0-Wall. SPAZIO smart reinforced motorized is a product indicated in the construction of padded **open base**. Finally, the exposed parts, on request, can be embellished with various finishes.
