Benefit: This mechanism from SUITE invisible D.S.C. two ways series is characterized by high innovation. It is designed to be completely integrated with the upholstery and provides a wide choice of designs and finishes of the end product. The footrest is fastened at the centre and not at the sides, creating the invisible effect. In this way, the mechanism disappears without affecting the sofa outline even when the furniture is open. The presence of two actuators, a distinctive element of the two ways version, allows you to release the operation of the footboard,

making it completely independent of the seat and the back; which will be moved by another actuator. This will give us the choice of moving the footboard, just the seat, or both in a synchronized way. The result is endless choices in the desired relaxation position. Top version of the SPAZIO family, the mechanics is innovative because the footboard is able to rise even more: ninety millimeters compared to previous versions. SUITE invisible D.S.C two ways has been designed to make upholstered both CLOSED BASE and OPEN BASE (high feet up to 180mm).
