Positions:

Benefit: SUITE invisible advanced extra leg is a highly innovative mechanism in fact, there have been inserted gas pistons to have greater support of the footboard than the STD mechanics. Moving the product is simple, it will be enough to drive the engine: the seat will lower and incline keeping the footboard closed (advance position), and then reach the TV position by raising the legs with the help of the pistons. Once reached the latter, continuing to move the mechanism, you reach the "full-relax" position; exponentially increasing comfort and completely transforming the finished product both in aesthetics and in usability. The peculiarity of this footboard is that it is even longer (of 25 mm) than the standards, with

an inclination of the flap of 10 ° with respect to the floor. Thanks to this feature, the manufacturer has the ability to insert a longer tablet into the upholstery, thus ensuring greater support for the leg when opening. The invisible effect is obtained by fixing the footboard to the center and no longer to the sides. This allows the mechanics not to influence the product line and to disappear completely even when the padding is open, keeping a clean and cutting-edge design. Top version of the SPAZIO family, the mechanics is innovative because the footboard is able to lift even more: ninety millimeters compared to previous versions. SUITE invisible advanced extra leg has been designed to create upholstered OPEN BASE (high feet up to 150mm).

Optional

<p>SOME ACCESSORIES</p> <p>HEADREST & RATCHETS</p>		<p>ELECTRIC KIT</p> <p>ACTUATORS</p>		<p>CONTROL SYSTEM</p> <p>BUILT IN SWITCHES</p>	<p>CONTROL PLATES</p>
